SAFETY DATA SHEET

Sulphonate Complex Grease (SG5)

Section 1. Identification		
Product identifier	:	Sulphonate Complex Grease (SG5)
Product type	:	Grease
Product use	:	Grease for industrial applications. For specific
		application advice see appropriate PDS or consult
		our company representative.
Supplier	:	PodLee International LTD.
ADD	:	7400 S Miller Rd, Buckeye, AZ 85326, USA
EMERGENCY TELEPHONE NUMBER	:	+1 213 9868879

Section 2. Composition/information on ingredients

Ingredient name	:	CAS number	%
White mineral oil (petroleum)	:	8042-47-5	70–85
Sulfonic acids, petroleum, calcium salts	:	61789-86-4	5-15
Octadecanoic acid, 12-hydroxy-, calcium salt	:	3159-62-4	5-10
Quaternary ammonium compounds	:	68956-79-6	1–10
Sulfonic acids, petroleum	:	61789-85-3	0.5–2
ВНТ	:	68952-33-0	1–2

Section 3. Hazards identification

Classification of the substance or mixture	:	Not classified
GHS label elements		
Signal word	:	No signal word.
Hazard statements	:	No known significant effects or critical hazards.
Precautionary statements		
Prevention	:	Not applicable.
Response	:	Not applicable.
Storage	:	Not applicable.
Disposal	:	Not applicable.
Other hazards	:	Defatting to the skin.

Section 4. First aid measures					
Skin contact	: Wash skin thoroughly with soap and water or use recognized skin cleanser.				
	Remove contaminated clothing and shoes. Wash clothing before reuse. Clean				
	shoes thoroughly before reuse. Get medical attention if symptoms occur.				
Eye contact	: In case of contact, immediately flush eyes with plenty of water for at least 15				
	minutes. Eyelids should be held away from the eyeball to ensure thorough				

Product Name: SG5 Sulphonate Cor	Page: 1 / 7	
Version 2.01	Date of issue 11/26/2024	Language English

		rinsing. Check for and remove any contact lenses. Get medical attention.
Inhalation	:	Do not induce vomiting unless directed to do so by medical personnel. Get
		medical attention if symptoms occur.
Notes to physician	:	Treatment should in general be symptomatic and directed to relieving any
		effects.
		Note: High Pressure Applications
		Injections through the skin resulting from contact with the product at high
		pressure constitute a major medical emergency. Injuries may not appear
		serious at first but within a few hours tissue becomes swollen, discoloured
		and extremely painful with extensive subcutaneous necrosis.
		Surgical exploration should be undertaken without delay. Thorough and
		extensive debridement of the wound and underlying tissue is necessary to
		minimise tissue loss and prevent or limit permanent damage. Note that high
		pressure may force the product considerable distances along tissue planes.
Specific treatments	:	No specific treatment.

Section 5. Firefighting measures

Specific hazards arising	:	In a fire or if heated, a pressure increase will occur and the
		container may burst.
Hazardous thermal	:	Combustion products may include the following: carbon oxides
decomposition products		(CO, CO ₂) (carbon monoxide, carbon dioxide)
Extinguishing media		
Suitable extinguishing media	:	In case of fire, use foam, dry chemical or carbon dioxide
		extinguisher or spray.
Unsuitable extinguishing media	:	Do not use water jet.

Section 6. Accidental release measures

Personal precautions, protective equipment and emergency procedures

For non-emergency personnel	: No action shall be taken involving any personal risk or without		
	suitable training. Evacuate surrounding areas. Keep unnecessary		
	and unprotected personnel from entering. Do not touch or walk		
	through spilt material. Put on appropriate personal protective		
	equipment. Floors may be slippery; use care to avoid falling.		
For emergency responders	: If specialized clothing is required to deal with the spillage, take		
	note of any information in Section 8 on suitable and unsuitable		
	materials. See also the information in "For non-emergency		
	personnel".		
Environmental precautions	: Avoid dispersal of spilt material and runoff and contact with soil,		
	waterways, drains and sewers. Inform the relevant authorities if		
	the product has caused environmental pollution (sewers,		
	waterways, soil or air).		
Small spill Methods and material for containment and cleaning up			

Small spill	:	Stop leak if without risk	Move	e containers	from spill	area. Absorb

Product Name: SG5 Sulphonate Complex Grease	Page: 2 / 7
Version 2.01 Date of issue 11/2	2024Language English

Large spill

with an inert material and place in an appropriate waste disposal container. Dispose of via a licensed waste disposal contractor.

 Stop leak if without risk. Move containers from spill area. Prevent entry into sewers, water courses, basements or confined areas. Contain and collect spillage with noncombustible, absorbent material e.g. sand, earth, vermiculite or diatomaceous earth and place in container for disposal according to local regulations. Dispose of via a licensed waste disposal contractor.

Section 7. Handling and storage

Precautions for safe handling	
Protective measures :	Put on appropriate personal protective equipment (see Section 8).
Advice on general :	Eating, drinking and smoking should be prohibited in areas where
occupational hygiene	this material is handled, stored and processed. Wash thoroughly after
	handling. Remove contaminated clothing and protective equipment
	before entering eating areas. Contaminated work clothing should not
	be allowed out of the workplace. See also Section 8 for additional
	information on hygiene measures.
Conditions for safe storage, :	Store in accordance with local regulations. Store in original container
including any	protected from direct sunlight in a dry, cool and well-ventilated area,
incompatibilities	away from incompatible materials (see Section 10) and food and
	drink. Keep container tightly closed and sealed until ready for use.
	Store and use only in equipment/containers designed for use with this
	product. Containers that have been opened must be carefully resealed
	and kept upright to prevent leakage. Do not store in unlabeled
	containers. Use appropriate containment to avoid environmental
	contamination.
Not suitable :	Prolonged exposure to elevated temperature.

Section 8. Exposure controls/personal protection

Recommended monitoring	:	Reference should be made to appropriate monitoring standards.
procedures		Reference to national guidance documents for methods for the
		determination of hazardous substances will also be required.
Appropriate engineering	:	Provide exhaust ventilation or other engineering controls to keep the
controls		relevant airborne concentrations below their respective occupational
		exposure limits.
		All activities involving chemicals should be assessed for their risks to
		health, to ensure exposures are adequately controlled. Personal
		protective equipment should only be considered after other forms of
		control measures (e.g. engineering controls) have been suitably
		evaluated. Personal protective equipment should conform to
		appropriate standards, be suitable for use, be kept in good condition
		and properly maintained.

	Your supplier of personal protective equipment should be consulted
	for advice on selection and appropriate standards. For further
	information contact your national organisation for standards.
	The final choice of protective equipment will depend upon a risk
	assessment. It is important to ensure that all items of personal
	protective equipment are compatible.
Respiratory protection	: In case of insufficient ventilation, wear suitable respiratory
	equipment. The correct choice of respiratory protection depends upon
	the chemicals being handled, the conditions of work and use, and the
	condition of the respiratory equipment.
Eye/face protection	: Safety glasses with side shields.
Hand protection	: Wear protective gloves if prolonged or repeated contact is likely.
	Wear chemical resistant gloves.
Skin protection	: Use of protective clothing is good industrial practice.
Hygiene measures	: Wash hands, forearms and face thoroughly after handling chemical
	products, before eating, smoking and using the lavatory and at the
	end of the working period. Appropriate techniques should be used to
	remove potentially contaminated clothing. Wash contaminated
	clothing before reusing. Ensure that eyewash stations and safety
	showers are close to the workstation location.

Section 9. Physical and chemical properties

Colour	:	Brown. [Light]
Odour	:	Not available
Flash point (Base Oil)	:	Open cup: > 180°C (>356°F) [Cleveland ASTM D 92]
Dropping Point	:	300°C (572°F)) [Cleveland ASTM D 2265]
Vapour pressure	:	mmHg@20°C: < 0.1
NLGI	:	2 [Cleveland ASTM D 217]

Section 10. Stability and reactivity

:	No specific test data available for this product. Refer to
	Conditions to avoid and Incompatible materials for
	additional information.
:	The product is stable.
:	Under normal conditions of storage and use, hazardous
	reactions will not occur.
	Under normal conditions of storage and use, hazardous
	polymerisation will not occur.
:	Strong oxidizing materials.
:	Avoid all possible sources of ignition (spark or flame).
:	Under normal conditions of storage and use, hazardous
	decomposition products should not be produced.

Section 11. Toxicological information

Information on toxicological effects						
Information on likely routes of	:	Routes of entry anticipated: Oral, Dermal, Inhalation, Eyes.				
exposure						
Potential acute health effects						
Eye contact	:	No known significant effects or critical hazards.				
Inhalation	:	Vapour inhalation under ambient conditions is not normally a				
		problem due to low vapour pressure.				
Skin contact	:	Defatting to the skin. May cause skin dryness and irritation.				
Ingestion	:	No known significant effects or critical hazards.				
Symptoms related to the physical, chemical and toxicological characteristics						
Eye contact	:	No specific data.				
Inhalation	:	No specific data.				
Skin contact	:	Adverse symptoms may include the following: irritation,				
		dryness, cracking				
Ingestion	:	No specific data.				

Section 12. Ecological information

Toxicity	:	No known significant effects or critical hazards.		
Environmental effects				
Persistence/degradability	:	Expected to be biodegradable.		
Bioaccumulative potential	:	No specific data.		
Other ecological information	:	Spills may form a film on water surfaces causing physical		
		damage to organisms. Oxygen transfer could also be impaired.		

Section 13. Disposal considerations

Disposal methods	: The generation of waste should be avoided or minimised wherever possible.
	-
	Significant quantities of waste product residues should not be
	disposed of via the foul sewer but processed in a suitable
	effluent treatment plant. Dispose of surplus and non-recyclable
	products via a licensed waste disposal contractor. Disposal of
	this product, solutions and any by-products should at all times
	comply with the requirements of environmental protection and
	waste disposal legislation and any regional local authority
	requirements. Waste packaging should be recycled. Incineration
	or landfill should only be considered when recycling is not
	feasible. This material and its container must be disposed of in a
	safe way. Empty containers or liners may retain some product
	residues. Avoid dispersal of spilt material and runoff and contact
	with soil, waterways, drains and sewers.

Section 14. Transport information

UN number	:	Not regulated.
Code of Dangerous Goods	:	Not regulated.
Packing group	:	II
Special precautions for user	:	Not available.

Section 15. Regulatory information

International regulations		
Chemical Weapon Convention List	:	Not listed.
Schedules I, II & III chemicals		
Montreal Protocol	:	Not listed.
Stockholm Convention on Persistent	:	Not listed.
Organic Pollutants		
Rotterdam Convention on Prior Informed	:	Not listed.
Consent (PIC)		
UNECE Aarhus Protocol on POPs and	:	Not listed.
Heavy Metals		
Safety, health and environmental	:	No known specific national and/or regional
regulations specific for the product		regulations applicable to this product (including its
		ingredients).
Regulation according to other foreign laws	:	All components are active or exempted.
United States inventory (TSCA 8b)	:	All components are active or exempted.
Australia inventory (AIIC)	:	All components are active or exempted.
Canada inventory	:	All components are active or exempted.
China inventory (IECSC)	:	All components are active or exempted.
Japan inventory (CSCL)	:	All components are active or exempted.
Korea inventory (KECI)	:	All components are active or exempted.
Philippines inventory (PICCS)	:	All components are active or exempted.
Taiwan Chemical Substances Inventory	:	All components are active or exempted.
(TCSI)		

Section 16. Other information

History		
Date of issue/Date of revision	:	11/26/2024
Date of previous issue	:	11/20/2019
Version	:	2.01
Prepared by	:	Product Stewardship

Notice to reader

All reasonably practicable steps have been taken to ensure this data sheet and the health, safety and environmental information contained in it is accurate as of the date specified below. No warranty or representation, express or implied is made as to the accuracy or completeness of the data and information in this data sheet.

Product Name: SG5 Sulphor	Page: 6 / 7	
Version 2.01	Date of issue 11/26/2024	Language English

The data and advice given apply when the product is sold for the stated application or applications. You should not use the product other than for the stated application or applications without seeking advice from PodLee Company.

It is the user's obligation to evaluate and use this product safely and to comply with all applicable laws and regulations. The PodLee company shall not be responsible for any damage or injury resulting from use, other than the stated product use of the material, from any failure to adhere to recommendations, or from any hazards inherent in the nature of the material. Purchasers of the product for supply to a third party for use at work, have a duty to take all necessary steps to ensure that any person handling or using the product is provided with the information in this sheet. Employers have a duty to tell employees and others who may be affected of any hazards described in this sheet and of any precautions that should be taken. You can contact the PodLee company to ensure that this document is the most current available. Alteration of this document is strictly prohibited.
